

# **Gree Guangming Solar Power Generation**

## Overview

---

How many GE gas turbines will be installed in Guangdong?

China's state-owned Shenzhen Energy Group has ordered three GE 9HA.01 gas turbines for its Guangming combined-cycle power project in Guangdong province. The first unit of the 2 GW plant is due operational by the end of 2023, in time to balance capacity lost by the retirement of the Guangdong Shajiao coal-fired power complex targeted in 2025.

How will GE Power a new power plant?

The plant will be powered by record-setting technology: in 2016, GE and EDF officially inaugurated the first ever combined-cycle power plant equipped with GE's 9HA gas turbine in Bouchain, France.

How many GW of electricity will a GE plant deliver?

Powered by three GE 9HA.01 gas turbines, the plant is expected to deliver up to 2 gigawatts (GW) of electricity to the most populous province in the country, with a population of approximately 126 million.

Why did GE choose Harbin Electric for Guangming power plant?

"GE and Harbin Electric will provide us with the highest standard of quality and reliability for our Guangming power plant. We ordered GE's H-Class technology for its ability to generate significant electrical output in a flexible and efficient way—crucial for the population of Guangdong province—while helping to ensure reliability of supply."

Who is GE gas power & Qinhuangdao energy service center?

The two companies established Qinhuangdao Energy Service Center in 2004, focusing on the maintenance and services of heavy-duty gas turbines hot gas path components. From 2017, GE Gas Power entered this strategic partnership to build a gas turbine manufacturing joint venture in Qinhuangdao.

Who is GE gas power?

Based in China for over 40 years, GE has been delivering innovative products and services that create significant value for its gas power generation customers to tackle the energy transition challenge. GE Gas Power serves 100+ customers and more than 200 gas turbines in mainland China, with an installed power capacity of 46 GW. ###
