

Ground mount solar system kit

Overview

How do I choose a ground mount solar system?

Once you have your kit, you can choose a straightforward ground mounting system, like the Ground Mount Solar Rack. Not only is this combination DIY-friendly, it is much more affordable than a traditional, roof-mounted solar power system. Fixed tilt will be based on your zip code used when ordering.

Can a ground mount solar rack hold solar panels?

You can use the Ground Mount Solar Rack to hold solar panels of all sizes and power ratings, so there is no need to worry about compatibility issues. Simply select the option that matches the number of panels you have in your array, and you will receive an appropriately sized system.

What is the best racking system for a ground-mount solar system?

The IronRidge XR Ground Mount System is the premier solution for installing ground-mount solar systems. We've partnered with IronRidge, the leading supplier of solar structural hardware, to bring you the best racking solutions for your ground-mount solar kit. Enjoy the highest quality racking from one of the most trusted brands in the industry.

Can a ground mount be used with a solar panel?

This ground mount will also allow you to switch between winter and summer angles, increasing solar production by as much as 20%! Compatible with most common solar power panel sizes up to a maximum of 1038mm wide. Contact us directly to verify and confirm compatibility with specific solar modules. User Manual For Adjustable Ground Mount.

Can a powerrack be used in a ground-mounted solar panel kit?

Compatible With All Ground-Mount Kits The PowerRack can be substituted for rail-based racking in any of our ground-mounted solar panel kits. Fixed 25-degree pitch is optimal for the majority of locations in the USA. Ground can

be leveled to change the mounting angle if necessary.
