

# Harbor freight solar panel setup

## Overview

---

How do I set up a solar panel kit?

1. Locate the Solar Panels (12) where they will receive full, unobstructed sunlight, especially during midday. Nearby trees or tall plants will drop debris, requiring the panels to be cleaned more frequently. 2. The setup location for the Solar Panel Kit must be inaccessible to children to prevent electric shock.

How to install solar panels?

Build a childproof enclosure if needed. 3. Install the charge controller/regulator and batteries in a weatherproof enclosure with proper ventilation. Select a mounting location for the Solar Panel Kit. The Solar Panels should face the Sun, and not be blocked by shadows. The location should allow the Panels to be protected from accidental damage.

How do you charge a solar panel?

use an appropriate charge controller whenever connected to battery. Charge, store, and maintain batteries according to supplier's instructions. Dry solar panels and outdoor wiring thoroughly while wearing electrically insulated gloves. cover all solar panels with an opaque cover, such as a blanket. Disconnect all solar panels.

How to choose a solar panel kit?

Select a mounting location for the Solar Panel Kit. The Solar Panels should face the Sun, and not be blocked by shadows. The location should allow the Panels to be protected from accidental damage. The location should be flat, stable and able to support the weight of the Solar Panel Kit's accessories.

How do you attach a connection brace to a solar panel?

Use Wing Nuts (9) to fasten the Connection Brace (7) onto the top back ends of solar panels. See Figure B. Repeat for the bottom ends of panels. Insert Screws into mounting holes along the bottom end and fasten Connection

Brace onto the back using Wing Nuts. See Figure C.

How do you mount two solar panels together?

Place two panels side-by-side on a flat surface. Do not drop the panels or allow anyone to lean or step on them. Insert Screws (6) into the innermost mounting holes of first two solar panels. See Figure A. Use Wing Nuts (9) to fasten the Connection Brace (7) onto the top back ends of solar panels.
