

# Highly intelligent mono photovoltaic three piece module 510w

## Overview

---

What is the power output of the vertex 510w solar module?

The Vertex 510W black frame module. Chinese solar module manufacturer Trina Solar has launched a new Vertex solar module with a power output of 510 W. The new black frame module is part of the Vertex TSM-DE18M.08 (II) series that, prior to the launch of this new product, offered panels with a power range of 480 to 505 W.

Which solar module is best for commercial rooftop projects?

The latest product in the Vertex series from the Chinese manufacturer has an efficiency of 21.2%. It was designed for commercial rooftop projects. The Vertex 510W black frame module. Chinese solar module manufacturer Trina Solar has launched a new Vertex solar module with a power output of 510 W.

Why should you choose a 500W+ vertex Solar System?

with virtually any mainstream solar system design. Multi-busbar, with the capability to increase light absorption, perfectly matches the large-area cell. Technology integration enables the 500W+ Vertex modules to achieve higher power and power generation capacity per watt.

What is the 600W+ photovoltaic open innovation Ecological Alliance?

The 600W+ Photovoltaic Open Innovation Ecological Alliance was announced on 14 July – a formation of 39 firms that aims to create a new collaborative and innovative ecosystem through open collaboration, synergizing the main resources of the industry chain and integrating core processes such as R&, manufacturing and applications.

What is a 500W+ vertex module?

The 500W+ Vertex module employs cells based on 210mm silicon wafers, which is the largest possible wafer size provided by the semiconductor industry and brings the highest power output.

What is 510 W vertex?

“An aesthetically versatile monochrome look and simpler product options means that 510 W Vertex modules will suit a variety of rooftops. Installers and distributors can stock, supply and use one universal product for their schemes.”

### Trina Solar launches Vertex 510W module

The new Vertex 510W black frame module, TSM-DE18M.08(II), is an addition to the ultra-high power rooftop module range, which also includes Vertex S 410W modules with black frame or in full black. As all Vertex modules, the 510W product features 210mm cells and high-density interconnect technology to deliver up to 21.2% module efficiency.

### Trina Vertex 485-510W Datasheet Solar Analytica Verified

o Up to 21.2% module e#ciency with high density interconnect technology o Multi-busbar technology for better light trapping e\$ect, lower series resistance and improved current collection
