

# Household energy storage new energy equipment

## Overview

---

A single battery may not be able to power your whole home, so you'll need to prioritize what's essential, such as lights, outlets, air conditioning, the sump pump, and so on. But if you want to run everything in your house, some systems allow you to stack or piggyback more than one unit to achieve the level of backup.

Batteries and solar panels store energy as direct current or DC. Connecting DC-coupled systems to solar results in less power loss. The grid and your home run on alternating current, or AC power. AC systems are slightly less.

Some appliances, such as central air conditioning or sump pumps, require more power to start up than once they are running. Make sure the.
