

How are Seraphim photovoltaic panels

Overview

The Seraphim panels are unobtrusive and sit close to the roof, making for a cleaner overall look. Additionally, the power production is efficient. How many solar panels does Seraphim solar have?

Seraphim Solar currently has 132 solar panels approved by the Clean Energy Council in Australia under the name “Seraphim Solar System Co Ltd”. This is a requirement to be eligible for the federal STC solar rebate.

Why should you choose Seraphim solar panels?

With manufacturing facilities spread internationally, Seraphim is poised to further its impact on the solar industry through reliable and efficient solar energy solutions. Seraphim offers several solar panel ranges featuring bifacial and monofacial half-cut cells in all-black designs, tailored for residential solar setups.

What is Seraphim solar?

It offers a range of solar panels designed for residential, commercial and industrial applications. Seraphim’s commitment to innovation and sustainability has positioned it as a notable player in the solar industry.

Does Seraphim offer bifacial and monofacial solar panels?

Seraphim offers several solar panel ranges featuring bifacial and monofacial half-cut cells in all-black designs, tailored for residential solar setups.

Complete our short form to request solar quotes for your home Get free, no obligation quotes from up to 5 local solar installers Compare quotes and pick the option that best suits your needs.

Are seraphim solar panels available in Australia?

In mid 2020 Seraphim have increased their push into the Australian market agreeing to a 50 MW solar module supply agreement with the Australian based solar wholesaler and importer Raystech Group. The companies that

import Seraphim Solar's panels hold the responsibility for servicing warranty claims in the Australian market.

Do Seraphim solar panels come with a warranty?

Most Seraphim solar panels come with a 15-year product warranty which is ahead of the market standard of 12 years. The performance warranty for solar panels guarantees a maximum rate at which the solar panel will degrade over time.
