

How do you extinguish a lithium ion battery fire

Overview

How do you extinguish a lithium battery fire?

Importantly, the appropriate fire extinguishing method will vary depending on the type of lithium battery in question (such as lithium-ion, all-solid-state lithium-ion or lithium polymer). For standard lithium-ion battery fires, the sprinkling of fine water mist may be used to suppress the fire.

Can a lithium-ion battery fire be extinguished?

In all circumstances, only suitably trained personnel/emergency-responders should attempt to extinguish early-stage lithium-ion battery fires, when it is safe to do so. As lithium-ion battery fires create their own oxygen during thermal runaway, they are very difficult for fire and rescue services to deal with.

How do lithium ion batteries start a fire?

How do fires from lithium-ion batteries start?

Lithium-ion battery fires happen for a variety of reasons, such as physical damage (e.g., the battery is penetrated or crushed or exposed to water), electrical damage (e.g., overcharging or using charging equipment not designed for the battery), exposure to extreme temperatures, and product defects.

Can lithium ion batteries be controlled if a fire happens?

Due to lithium-ion batteries generating their own oxygen during thermal runaway, it is worth noting that lithium-ion battery fires or a burning lithium ion battery can be very difficult to control. For this reason, it is worth understanding how lithium-ion fires can be controlled should a fire scenario happen.

Can a lithium-ion battery catch fire?

While the chances of a lithium-ion battery catching fire are minimal, it's important that you're aware of the possibility and have a plan of action prepared if it ever happens. Our first aid cabinet service, fire extinguisher inspections, defibrillator (AED) and eyewash services help you keep your employees safe.

How do you manage a lithium ion battery failure?

The best way to manage a lithium-ion (Li-ion) battery failure, either fire or explosion, is to address the hazards holistically. If appropriate, use a fire suppression design specifically designed for this application.
