

# **How long does it take for a solar generator to pay back**

## Overview

---

As a quick reminder (unless you've never read any of my other articles before in which case, how very dare you! ), the solar and battery solution I have in my home consists of the following: 1. 10x 390W Trina Vertex solar PV panels 2. 10x SolarEdge power optimisers (one attached to each panel) 3. SolarEdge SE3680H string.

How much did this all cost then. Well, the main bill from my installer included the panels, optimisers, inverters, battery, Eddi, the additional work for the EPS and of course all of the wiring.

What assumptions am I making then?

1. The first one is that the current Octopus Go tariff, which is about 42p peak and 12p off-peak will apply for me from June 2023 2. I'll assume a 5% rate of.

At the top of my spreadsheet is a parameters section and in there you'll need to enter all of the various values connected with your historical data and assumptions before you begin. You tell it how much your system.

Before I can predict how much my system might save me in energy costs per year, I'll need to know how much it actually saved me during the year that.

## How long does it take for a solar generator to pay back
