

# How many years does it take for a solar generator to pay back

## Overview

---

As a quick reminder (unless you've never read any of my other articles before in which case, how very dare you! ), the solar and battery solution I have in my home consists of the following: 1. 10x 390W Trina Vertex solar PV.

How much did this all cost then. Well, the main bill from my installer included the panels, optimisers, inverters, battery, Eddi, the additional work for the EPS and of course all of the wiring.

Before I can predict how much my system might save me in energy costs per year, I'll need to know how much it actually saved me during the year that I've had it so far. I used Home Assistant to.

What assumptions am I making then?

1. The first one is that the current Octopus Go tariff, which is about 42p peak and 12p off-peak will apply for me from June 2023 2. I'll assume a 5% rate of inflation on those rates annually 3. I'm.

At the top of my spreadsheet is a parameters section and in there you'll need to enter all of the various values connected with your.

## How many years does it take for a solar generator to pay back

### Best Solar Powered Security Cameras in 2024: Top Picks and ...

The Anker SOLIX Solar Generator offers a reliable way to power traditional cameras sustainably. The Anker SOLIX F3800 Solar Generator + 400W Solar Panel provides ...

### How many years does it take to break even on your ...

I compared solar to generator - generator is 18k so the uplift from that to solar was a net 12k (after tax breaks etc). My break even for 12k is ~7.5 years which isn't half bad My solar panels will pay back in 10 years, probably less as ...
