

How much do solar panels cost in nc

Overview

How much do solar panels cost in North Carolina?

As of July 2024, the average solar panel system costs \$2.49/W including installation in North Carolina. For a 5 kW installation, this comes out to about \$12,442 before incentives, though prices range from \$10,576 to \$14,308. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in North Carolina?

While a 5 kW system will only cost you \$12,442 in North Carolina, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill.

Are solar panels tax deductible in North Carolina?

If you install a solar panel system to power a primary or secondary residence, you can claim 30% of project costs as a federal tax credit. Home batteries with at least 3 kWh of capacity are also eligible for the incentive. The following six installers are our picks for the best solar companies in North Carolina:

Does North Carolina offer a solar tax credit?

Many people mistakenly refer to this tax credit as the North Carolina solar tax credit but it is actually a federal tax credit. North Carolina itself does not offer a solar tax credit. Levelized cost of power from this typical solar system installed on a home in North Carolina over 25 years is 5.1 cents/kWh.

How much does a 7 kW solar array cost in North Carolina?

Furthermore, if you install a 7 kW solar array in North Carolina, you can expect a net cost of \$12,887 after the 30% federal tax credit. Considering the estimated energy savings of \$1,355 per year, your payback period would be around 9.5 years.

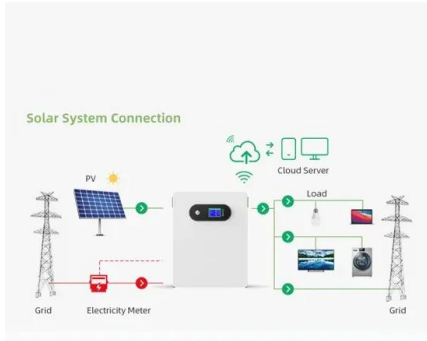

How long do solar panels last in North Carolina?

That's why over 33,000 North Carolina homeowners have used EnergySage to receive and compare quotes for solar installations. You can expect to earn back your initial solar investment through electricity savings in about 10.49 years, while most systems last at least 25 years.
