

# How much does a 20 square meter photovoltaic panel cost

## Overview

---

The cost of a 20 square meter photovoltaic panel system varies, but based on quotes, you can expect to pay around \$20,948 after federal tax credits<sup>1</sup>. The average cost of solar panels generally ranges from \$17,350 to \$38,000, including hardware, installation, and soft costs<sup>2</sup>. The actual cost depends on factors such as system size, panel type, wattage, and other components<sup>345</sup>.

Based on thousands of quotes in the EnergySage Marketplace, you'll pay about \$20,948 to install a system around that size in 2024 after federal tax credits.

The average cost of solar panels ranges from \$17,350-\$38,000. This price range includes hardware, installation, and soft costs, but it does not account for additional components like solar batteries.

Installing solar panels costs an average of \$27,150, though it ranges between \$3,500 and \$55,000 based on system size, panel type, wattage, and more.

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home.

How much do residential solar panels cost?

On average, U.S. homeowners pay about \$15,250 to install residential solar energy systems. How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per

year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2024, the price of solar panels in the UK can vary depending on several factors.

What is a solar panel cost calculator?

The solar panel cost calculator below will help you determine how much energy you can save, as well as the financial rewards you could potentially earn by installing a solar panel array on your property. Please bear in mind that the calculator will provide estimates based on the information you have provided.

How much does a solar PV system cost?

Here we have assumed each panel is 430 Watts, and can produce roughly 345kWh of energy per year. Basing our analysis of real-life pricing in 2024, we found that a system with 12 PV panels would cost around £6,900, and prices go up and down from there depending on the panel count.

How much does a 3.5 kWp solar panel system cost?

A 3.5 kWp solar panel system would typically require around 10 solar panels (at 350 W each) and cost between £5,000 and £10,000. \*kWp stands for 'kilowatt peak'. This is the amount of power that a solar panel or array will produce per hour in prime conditions.

How much does it cost to clean solar panels?

However, if you notice your solar panels becoming dirty – for example, bird droppings, or dust building up on them during a dry, hot summer – you should consider getting them cleaned. Solar panel cleaning by a professional will cost around £100, but you can do it yourself with a hose. How much do solar batteries cost?
