Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.

Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

Why are residential solar panels so expensive?

Since 2010, residential solar panel prices have fallen by roughly 50% while US solar deployment has grown by over 2,000%. The slight rise in residential solar pricing from 2020-2023 is largely attributed to supply chain tangles from the pandemic.
