

How much does it cost to invest in solar panels

Overview

Solar panels tend to range in price from £150 - £400 each, depending on the size and efficiency rating of each panel and the level of energy you need. How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

How much does a solar & battery system cost?

The average cost of a 3kWp solar panel system for a typical property with two or three bedrooms is about £9,000, including installation. This jumps up to around £11,000 if you're adding a 5kWh battery. This is a great time to get a solar & battery system, as there's currently 0% VAT on both panels and batteries.

Do solar panels save money?

Solar panels not only save you money, but they can also earn you cash, all while helping to reduce the planet's carbon footprint. And they'll still generate electricity on gloomy days, which the UK experiences a lot of. So, what are the barriers stopping homeowners from installing them?

Cost, mainly.

How much does a solar panel cost in the UK?

The average cost of a solar panel system for a typical three-bedroom house in the UK is £9,600, including a battery. ☐Solar panels can save you up to £1,014 annually, totalling nearly £30,000 of savings over their lifespan. ☐Adding a solar battery can boost your energy savings by up to 90 per cent.

Why are solar panels so expensive?

Panel efficiency: The more sunlight a solar panel can convert into electricity per sq metre, the more expensive it will be. Panel number: More solar panels means more materials, which means a higher cost. You can limit the number of panels you need by choosing highly efficient ones (although they may cost more).

Are solar panels a good investment?

“Homeowners should consider the cost versus long-term benefits of installing solar panels by evaluating factors like break-even time and potential savings. On average, it takes about eight years to break even with a standard solar panel setup. For a family planning to stay long-term, this is a good investment.
