Overview

How much do solar batteries cost?

Solar batteries cost an average of \$10,000 in addition to installation costs. You may need multiple batteries to power your whole house with solar batteries. Solar batteries can help you save money by reducing your reliance on a utility company.

How much does a solar battery storage system cost?

Installation and permitting fees vary by location and installer, but the NREL estimates the battery itself typically costs \$16,007. *Based on a 2022 report. Many factors influence the total cost of a solar battery storage system.

Are solar batteries worth it?

Solar batteries are expensive, but financial incentives are available to lower the cost. Prices often depend on the battery's storage capacity, expected life span, brand and other factors. Homeowners often find that solar batteries are worth it for energy security — even if they're not worth it financially.

How much does a 5 kWh solar battery cost?

As a general guide, EnergySage keeps track of solar battery quotes from installers that use its service and reports that battery storage prices reached “new all-time lows” in late 2024 when they hit \$1,133 per kilowatt-hour stored. So a 5-kWh battery would cost \$5,665, before any federal or state incentives.

How does a solar battery system's storage capacity affect its cost?

A solar battery system's storage capacity directly impacts its cost. Batteries with higher capacities cost more than batteries that store less energy. Like solar batteries require inverters to convert the stored direct current (DC) energy into alternating current (AC) energy for household or commercial use.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.
