

# How much solar power can provide

LiFePO<sub>4</sub>

Wide temp: -20°C to 55°C

Easy to expand

Floor mount&wall mount

Intelligent BMS

Cycle Life:≥6000

Warranty :10 years

## Overview

---

How much power do solar panels provide?

Nearly 30% told us that their solar panels provided between a quarter and a half of the total electricity they needed over a year. There's a huge seasonal variation in how much of your power solar panels can provide. Read our buying advice for solar panels to see how much of your power solar panels could generate in summer.

How much electricity does a solar system produce?

According to our calculator, a 4.5 kilowatt (kW) system with 12 panels would produce on average 4,100 kilowatt hours (kWh) in a year, enough for a 3 bedroom house. However, there are a range of factors that can affect how much electricity your solar panels produce, from the efficiency of your system to the angle of your roof.

How many watts can a solar panel produce a year?

Most home panels can each produce between 250 and 400 Watts per hour. According to the Renewable Energy Hub, domestic solar panel systems usually range in size from around 1 kW to 5 kW. Allowing for some cloudier days, and some lost power, a 5 kW system can generally produce around 4,500 kWh per year.

How many solar panels do you need?

Solar panel systems tend to be made up of between six and 12 panels, with each panel generating around 400 to 450W of energy in strong sunlight. You can use our online assessment tool, Go Renewable, to find out what renewable technologies are suitable for your home. The average solar panel system is around 3.5 kilowatt peak (kWp).

How much electricity does a solar panel produce per m<sup>2</sup>?

Though of course, if you have a solar battery, you can simply store the extra

electricity and use it later. The average solar panel output per m<sup>2</sup> is 186kWh per year. Solar panels are usually around 2m<sup>2</sup>, which means the typical 430-watt model will produce 372kWh across a year.

How many kilowatts does a home solar system produce?

Household solar panel systems are usually up to 4kWp in size. That stands for kilowatt 'peak' output - ie at its most efficient, the system will produce that many kilowatts per hour (kWh). A typical home might need 2,700kWh of electricity over a year - of course, not all these are needed during daylight hours.
