What is a solar farm in Civilization VI Gathering Storm?

The Solar Farm is a standard tile improvement in Civilization VI: Gathering Storm. It is used to supply renewable Power to its city from flat terrain tiles. It cannot be built on Snow . +1 Production. +1 Gold. +2 Power. The Solar Farm is another, arguably more easily accessible way of supplying Power for your cities without burning fossil fuels.

What is power in Civilization VI Gathering Storm?

Back to Civilization VI Power is a new mechanic introduced in Civilization VI: Gathering Storm. It simulates electricity usage in modern cities. Power is needed for (almost) all late-game buildings and its production is one of the major contributors to CO 2 emissions and, consequently, natural disasters.

How do you get power in atomic era?

In the Atomic Era, you unlock Geothermal Plants, which give +4 Power and are built on Geothermal Fissures. In the Information Era, you unlock Solar Plants and Wind Farms, which give you +2 Power and are respectively built on any flat land and any hills. Yeah, Cardiff is insane. Had them and Auckland playing as Japan on archipelago my last game.

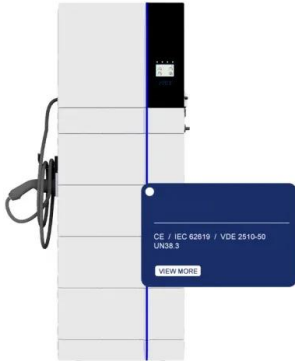

How much power does a city need?

A mid- to large-sized empire will need on average 5-8 Power per city when fully developed (assuming each has a Factory and two other Tier 3 buildings). That adds up to 50-80 Power for 10 cities.
