

# How to choose solar panels for bedrooms

## HEAT DISSIPATION

Cold aisle containment,  
making optimal refrigeration effect;

## Overview

---

In summary: A small home with 1-2 bedrooms will require a 2-3kW system with 5-8 350W panels, or 4-6 450W panels. A medium-sized home with 2-3 bedrooms will require a 4-5kW system with 10-13 350W panels, or 8-10 450W panels. A large home with 4-5 bedrooms will require a 6kW system with 16 350W panels, or 13 450W panels. How do I choose a solar panel system for my home?

Determining the appropriate size for a solar panel system for your home is crucial to maximise energy production and savings. Your installer will calculate the system size required to fulfil your energy requirements based on your household's energy consumption, available roof space, budget, and energy goals.

Which solar panels are best for your home?

As well as having good energy output, SunPower's Maxeon 6AC panels have a high efficiency rating of up to 23 per cent. These crack-resistant panels are ideal for all homes, especially those near the coast, as they're designed to withstand corrosion caused by salty air.

How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage — this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m<sup>2</sup> of roof space. Don't forget to include at least 30 cm from the roof's edge.

How much do solar panels cost?

The average domestic solar panel system costs £5,000 - £6,000, for a 4kW system in homes with 2-3 bedrooms. The total cost of solar panels depends on how many panels you need for your home, which in turn is dependent on your energy consumption.

## What size solar panels do I Need?

Although each solar panel system should be tailored to your exact needs, as a rough guide, a one-bedroom house typically requires a 1.5kW system, a three-bedroom property a 4.5kW system, and a system for a four-bedroom system should be 6kW or above.

## Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.
