

How to deal with rooftop photovoltaic panel leakage

Overview

How to Fix Roof Leaks Under Solar Panels

1. Identify the Source of the Leak
2. Disconnect and Remove the Affected Solar Panels
3. Repair the Roof
4. Inspect and Upgrade Mounting System
5. Reinstall and Seal Solar Panels

How do I prevent a roof leak under solar panels?

Proper installation techniques and regular maintenance are essential to prevent roof leaks under solar panels. Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production.

Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak?

There are various reasons your roof could leak after installing solar panels.

How do I know if my solar panels are leaking?

Pooling water on the roof or around the solar panels clearly indicates a roof leak. If you observe standing water after rainfall, it's crucial to investigate further and identify the source of the leak.

4. Decreased Energy Production or System Performance

A roof leak can also impact the performance of your solar panel system.

Why do solar panels leak?

Older roofs or roofs with existing damage may be more susceptible to leaks under the added weight and penetrations of solar panels. Flashing issues: Flashing is used to create a watertight seal around roof penetrations such as vents, chimneys, or skylights. If the flashing is damaged or improperly

installed, it can cause water to seep in.

What should I do if my roof leaks?

While you can check the roof for debris or damage, your best bet is to call your installer immediately. There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment.

How do I seal a leak under my solar panels?

Applying sealant is a temporary solution that can help to seal small gaps or cracks in the roof under your solar panels. This can be particularly useful when you have identified the source of the leak and it is accessible. Here are the steps to follow when applying sealant:
