

How to hang photovoltaic panels on the wall of the building

Overview

How to install vertical solar panels?

Vertical solar panels will require special mounting brackets for their installation process. You can install wall-mountable solar panels either parallel to your home walls or in the form of a canopy. In winter, the wall-mount solar system's electrical power production is at the maximum level.

Can solar panels be mounted on a wall?

So, although it is possible to mount solar panels on a wall, it's not ideal. You're also less likely to be able to mount as many solar panels on a wall as you would on a roof, which means they won't generate as much electricity as a roof-mounted system. What are the pros and cons of wall-mounted solar panels?

.

How do you install a solar panel on a wall?

Begin by securing the mounting frame to your pre-selected wall. Think of this as building a solid foundation for your solar energy household. Next, fix the solar panel on the mount. Like placing the final puzzle piece, this step brings your vision to life.

Are wall-mounted solar panels right for Your House?

Well, wall-mounted solar panels are ideal if your home lacks the right roof (perhaps it's too shaded, too steep or simply too small) to support a roof-mounted solar array. Or, possibly, you've already installed a solar system on your roof and want to maximise your home's clean energy-producing capacity by adding panels to your walls, too.

How to install wall-mount solar panels?

For installing wall-mount solar panels, firstly it is important to check the

suitability of your home walls. The wall must be strong enough to support the weight of the panels. Wall mount systems require a special hardware kit. The problem with wall mount systems is that they have to work against gravity to stay in place.

Which houses are best suited for vertical wall-mounted solar panels?

The houses best suited for vertical wall-mounted solar panels have a south-facing wall with unencumbered, unfiltered access to the sun all day. That means there shouldn't be any neighbouring buildings or trees close enough to cast shade on these solar panels.
