

# How to make a micro wind knife generator

## Overview

---

What is a DIY wind generator?

DIY Wind Generator : The idea of generating electrical energy using the wind energy always attracts me. So now being a well equipped DIYer its time to built the first wind generator from scratch. The whole idea is to built a small wind generator using reliable techni.

Can you build a wind generator from scratch?

So now being a well equipped DIYer its time to built the first wind generator from scratch. The whole idea is to built a small wind generator using reliable techniques and the stuff thats best suited to serve the purpose while gathering all the material from the hardware store or a junkyard. Well time to get our hands dirty.

How much power does a wind generator produce?

The generator is able to produce nearly 150 watts of power (12-15v at 14-10 Apms) with a wind speed of nearly 5 to 7 m/s. Now that is our first attemp at building a wind generator so we are looking forward to built a bigger one so get some more energy out of the winds. Hope you like the projects. Regards. DIY King.

How do you make a wind turbine rotor?

Place your lower magnet rotor onto the studs. You can either make your upper and lower magnet rotors with a rotor plate, epoxy, and 2" by 1" by ½" neodymium magnets, or you can buy this part prefabricated as part of a wind turbine kit or from a wind turbine part manufacturer.

How does a wind power generator work?

The wind power generator uses 24 magnets, copper wire fashioned into coils, and a metal plate for the main generator. The coils are arranged in a circular formation on a static plate, while the magnets are equally spaced on a moving

circular plate.

Do you need a generator to run a wind turbine?

Choose a generator. Your wind turbine needs to be connected to a generator to produce electricity. Most generators are direct current (DC), which means that to use one to provide household current you'll need to connect the generator to a power inverter to produce the alternating current (AC) that household appliances use.

## How to make a micro wind knife generator
