

How to make money in the solar power industry

Overview

Solar energy typically works by converting light energy from the sun into electricity. Photovoltaic (PV) energy is created by using flat solar panels that can be affixed to a structure's roof or arrayed across open spaces. Another method, known as thermal solar, uses a series of mirrors to focus the sun's energy on a single.

Most state governments offer some sort of tax subsidy or grants to encourage more widespread solar panel usage. As a result, the final cost after installation may be less than the sticker price. Furthermore, tax credits given for solar.

The Solar Investment Tax Credit (ITC), introduced in 2006, has created an average annual growth rate in solar of 52%, according to the Solar Energy Industries.

Solar power is becoming more affordable and more efficient at turning the sun's energy into usable electricity. For those seeking an investment option in the solar sector, solar company.
