

How to make money quickly by installing photovoltaic solar panels

Overview

The most common solar PV installation in UK homes is a 3.5kWp system, capable of generating approximately 3,000kWh of electricity each year in optimal conditions. This amounts to around 75% of a typical household's electricity consumption, meaning that a solar system can make a home largely self-sufficient, dramatically.

A large portion of potential solar panel earnings comes from the government's generation tariff, which is part of the Feed-In Tariff (FIT) scheme.

On top of the generation tariff, you also receive a fixed rate of 4.5p/kWh for any surplus electricity that you feed back into the National Grid. This rate is subject to change, but if you join the FIT scheme before April 2013 then it.

It's important to remember that all the solar PV earnings you make must be offset against the cost of installing and maintaining your solar system. Installation cost ranges between £2,500 to £15,000, and maintenance may.

How to make money quickly by installing photovoltaic solar panels

How to Install Rooftop Solar Panels: A Step-by-Step Guide

Preliminary Steps for Solar Panel Installation. Before starting with your rooftop solar panel system, make sure to do some key steps. You need to look at how much electricity ...
