

How to report a stolen photovoltaic inverter

Overview

What to Do in Case of Theft or Vandalism
Filing a Police Report
The first step in the event of a solar panel theft or vandalism incident should be to file a police report immediately. Contacting Your Insurance Company . Damage Assessment and Repairs . Forensic Investigation and Evidence Collection . Can solar panels be stolen without an inverter?

This is a technology that connects the photovoltaic panels to the inverter. You need to access the inverter to enjoy the sun's energy digitally. What this means is that if the solar panels get stolen without the inverter, the perpetrators will be unable to use them. Finally, you can glue or weld the solar panels to the surface of your roof.

How to stop solar panels from being stolen?

While locks, alarms, and cameras are the 3 best ways to stop your solar panels from being stolen, there are a few methods that can deter theft and one of those is by marking or engraving your solar panels so that they are easily identifiable if they do get stolen.

How do I recover stolen solar panels?

Another effective way to recover stolen solar panels is to make your panels easy to track. GPS tracking devices are used in many industries to prevent theft, most notably in motor vehicles. GPS tracking technology is extremely accurate and has been found to be an extremely effective way to recover stolen solar panels.

Are solar PV projects causing theft and vandalism?

The capital costs of solar PV projects can be enormous, running up into millions of dollars and with parks taking years to realise. Given this, developers want to make the most out of their investment but an increasing practice is threatening this return: theft and vandalism of solar technology.

Are solar panels a target for thieves?

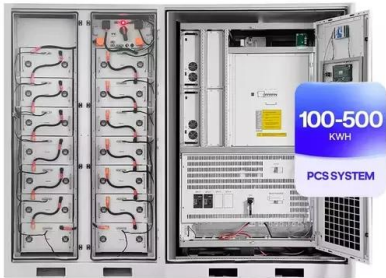

While it is not extremely common, solar panels can indeed be a target for thieves. This is especially true in more remote or isolated areas where surveillance is minimal and the solar panels can be removed with less risk of being caught.

How much money is stolen from a solar project?

In the UK alone, for example, a 2019 heist saw more than £900,000 (US\$1 million) of solar modules stolen from a project, while project security company SafeSite Facilities (SSF) estimates that organised crime in relation to solar projects is on the rise.
