

Ht solar power

Overview

Who is HT solar?

Off-Grid Solar Projects HT SOLAR has successfully completed off-grid solar energy projects in locations across the globe, ranging from residential to ship systems. Learn More Hybrid Power Projects HT SOLAR is a premier solar power device company specialized in Hybrid Power Projects.

Who is HT solar Enerji?

It is one of the Turkish subsidiaries of HT-SAAE, one of the organizations of China Aviation Science and Technology Company. HT Solar Enerji started its production activities in Istanbul, Turkey in 2016. It has a facility with a production capacity of 2 GW built on an area of 32,000 m² with an investment of over 35 million dollars.

Where is HT solar Enerji made?

HT Solar Enerji started its production activities in Istanbul, Turkey in 2016. It has a facility with a production capacity of 2 GW built on an area of 32,000 m² with an investment of over 35 million dollars. HT Solar Energy exports the panels it produces in Turkey from Europe to the USA and from the Middle East to North Africa.

Why should you choose HT solar?

HT SOLAR provides innovative solar power solutions for a rapidly growing market. Our products are reliable, efficient and cost-effective, so you can rely on us for reliable energy for different applications.

Is HT solar the most influential brand enterprise in China?

In 2019, the company was acknowledged as the “Most Influential Brand Enterprise” among Chinese security companies. By 2021, HT SOLAR had reached a landmark achievement, with annual sales exceeding the impressive figure of 100 million yuan. This marked a year of unprecedented success for

the company.

What is HT solar PERC?

HT Solar's CE and SA certified PERC solar cell modules, produced with Half-Cut technology, offer everything you are looking for in a solar module, with efficiency up to 21.7%, 12 years product warranty and 25 years power output warranty.

Ürünler

PERC is a modified technology that produces 6 to 12 percent more energy than conventional solar panels. PERC panels have an extra layer behind the cell. This allows some of the sun's rays to reflect back into the solar cell, giving them another opportunity to be converted into energy.
