

INVT photovoltaic inverter parameter table

Overview

What type of inverter & PV switching solution C2 IP54 protection-level inverters?

Inverter mains & PV switching solution C.2 IP54 protection-level inverters INVT provides IP54 protection-level inverters, which are divided into two types: One type implements auto mains & PV switching and the other type does not implement auto switching. The figure below shows the inverter dimensions.

What are the technical parameters of PV Grid-connected inverter?

Note: Technical parameters of PV grid-connected inverter refer to the appendix. The LED indicator panel as the human-computer interaction interface, may indicate the working state of the inverter. The LCD display shows the operating status of the inverter and various parameter information, as well as setting the inverter parameters.

What is PV Grid connected inverter?

The PV grid-connected inverter is the core part of solar PV grid-connected power generation system. The sunlight can be converted through PV panel to DC power, which further converted by grid-tied inverter to the sine AC current with the same frequency and phase position as the public grid, then feedback the AC power to the grid.

How to test a PV inverter?

The AC/DC breaker is selected correctly. The PV input voltage is in the allowed range of the inverter. The type, voltage, and power of the motor match those of the inverter. Close the DC breaker. The inverter automatically runs with a delay of 10 seconds. Check the water yield of the pump. If the water yield is normal, the trial run is successful.

How to install a PV inverter?

Pin NO. Connect the AC quick connect terminal to the inverter. Before

installing the PV inverter, you need to confirm the working voltage of the AC side of the product. for daily maintenance and repair of the inverter. Confirm the electrical safety marks on the installation site is clear enough.

Is PV Grid connected inverter suitable for crystalline silicon-type solar battery?

Note: PV grid-connected inverter is only suitable for crystalline silicon-type solar battery component. Permissions by local electric power agency must be obtained and the inverter grid-connected power generation operation must be done by professional technicians.

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 50% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart ITC Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
