

Individuals can install photovoltaic panels

Overview

Yes, it's possible and a number of people do install solar systems themselves, however it requires a significant amount of technical understanding of electrical systems. Do you need a solar panel system to be energy independent?

If you want to be fully energy independent, you will need more panels and a solar battery big enough to store the excess energy you generate. As long as you install a solar panel system powerful enough to cover your household's energy usage, you can rely on solar electricity for all your energy needs.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system – so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.
