

Indoor solar bracket assembly diagram

Overview

How to install rigid solar panels on a roof?

EcoFlow's rigid solar panels come with a Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

What is a solar racking?

The solar rack is the hardware under the solar module that secures the panel to a surface (roof, ground, pole) in the panel installation. If you don't get this right, then forget it-you are just buying yourself years of trouble. In this learning article, we will focus on how to select the proper solar racking.

How do you mount a solar panel array?

There are various mounting materials you might use, depending on where you mount your solar panel array. Let's cover a few options below: Aluminium: is strong, lightweight, and resists corrosion. It's easy to work with an aluminium angle, and any home drill will suffice for the holes you'll need to create.

What is a solar panel mount?

The purpose of a solar panel mount is to serve as a foundation for a solar panel. Mounting systems allow for solar panel arrays to be positioned in the most effective location to maximize the panel's exposure to sunlight. The type

of solar panel mounts will vary widely depending on the rooftop or surface type where it is being installed on.

How long does it take to install a solar racking system?

SolarTown offers all the necessary clamps or cap strips to support your installation. The installation of your solar energy system for your home is going to take 1 or 2 days and you will enjoy solar energy for 25 years or more. But you need to put in the time to design your system, and the solar racking is a critical component of your system.
