

Industrial battery pack

Overview

What makes a good battery pack?

- Temperature difference of less than 2°C, compensating for the shortcomings in battery consistency within the pack.
- High-voltage-resistant acquisition harness with more reliable performance and a maximum voltage resistance of up to AC7000V.
- Ultra-rigorous testing and verification covering all-weather and multi-operating scenarios.

What is a complete battery pack?

A complete battery pack means no assembly of battery modules, no additional battery management system or extra wiring - just one Lithium ion battery box that customers can integrate with its vehicles/machines and charger. It can also serve as a stand-alone battery unit. The battery pack works for 24V/48Ah systems and provides 1,2kWh.

What is advanced Li-ion battery pack?

Advanced Li-ion battery pack with high energy density and more than 20 year service life is an ideal solution for energy storage system of any capacity. Compact and scalable with modular 19" rack-mount design it can be easy to expand capacity from kWh to MWh scale.

Who makes lithium ion batteries?

Micropower Group has in-house development and production of Lithium ion batteries and battery system. Known for its high-quality, superior flexibility, the modular Lithium ion battery system Lionbrix is the optimal choice for industrial machines and vehicles.

What equipment is matched to the vanguard battery pack?

OEM equipment is matched to the Vanguard Battery Pack in its state-of-the-art Power Application Center. This unique offering allows Vanguard to tailor its versatile battery application expertise to ensure optimum equipment

performance.

What is a vanguard commercial battery?

*Total energy measured using a 0.2C discharge per IEC 61960-3:2017 The Vanguard Commercial Battery is the only complete battery solution, including lithium-ion battery packs, Battery Management System and battery chargers.
