

Install photovoltaic panels on roofs and ground

Overview

Can you install solar panels on the ground?

Solar panel installations are subject to 0% VAT, and a 4kW-5kW system with SEG can save £640 - £685. You must have heard about rooftop solar panels, but did you know that you can also install solar panels on the ground?

Ground mounted solar panels are installed on the ground instead of the roof.

Can you install ground-mounted solar panels on a pitched roof?

You can install ground-mounted solar panels, though you'll again need more space than you would if you installed panels on a pitched roof. This is because you'll need to space out your panels so they don't cast shade on each other, just like on a flat roof.

What is the difference between ground-mounted solar panels and on-roof solar panels?

Ground-mounted solar panels and on-roof solar panels differ primarily in their installation locations and associated benefits and challenges. Ground-mounted solar panels are installed on the ground, typically in open spaces, and offer greater flexibility in orientation and tilt, which can maximise energy production.

How do I install ground-mounted solar panels?

When it's time to fit your ground-mounted solar panels, installers will first need to dig a trench - around 450mm deep - from the solar panels to your property. This is to fit the cable that will transmit power from your array to your home's electricity supply.

Can you install solar panels on a roof?

Unlike rooftop installations, which are often limited by shading or the unalterable orientation of your home's roof, you can place ground-mounted

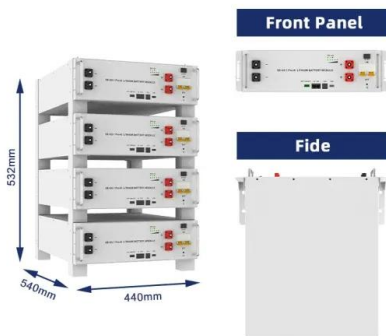

solar panels in the most sunlight-rich areas of your property. You can even tilt and angle them for more energy-efficient power production. A south-facing panel at an angle of 20-50 degrees is ideal.

How do solar panels attach to a roof?

Installers fix solar panels to a roof by lifting up some roof tiles and attaching mounting brackets to the rafters, before carefully placing the tiles back where they were. They'll then attach rails to these brackets, before locking solar panels into the rails.
