## Overview

---

In essence, integrated solar panels are the same as traditional solar panels. They absorb sunlight and convert it into usable electricity for your home. The difference is that instead of being mounted on top of your roof, they are built into its structure. This is done by replacing a section of your roof's materials with solar.

If you're considering installing in-roof solar panels, you'll want to know how much solar panels in the UK cost. For an average 2 - 3 bedroom household, integrated solar.
