IONIQ 5

age, ambient temperature and the power provided by the charger. Charge time increases in cold weather and if battery temperature activates safeguarding technology. In optimal conditions, the latest IONIQ 5 is capable of accepting power at up to 240 kW.

[Can an Ioniq 5 power your house? : r/Ioniq5](#)

solar panels on the roof will provide very little power during the day. 205W for 3-4 hours you might gain back 600-800Wh of energy; maybe 1200Wh in Southern CA/AZ, Spain or Australia. The Solar Panels only give you about 5-6 km of extra range per ...

Hyundai Ioniq 5 Max in Malaysia loses solar roof but gains a ...

Solar Roof on the Hyundai Ioniq 5 Max The lack of a solar roof for the 2023 Ioniq 5 Max isn't really a big deal especially if the car is going to be parked under a roof or covered car park most of the time. From our review, the Ioniq 5 Max test drive unit which has done over 10,000km in mileage, has only generated slightly over 32kWh.

2022 Hyundai Ioniq 5 review: International first drive

The Ioniq 5 is on its way to revolutionise Hyundai's EV game. It won't be cheap, but our first drive tells us buyers won't be disappointed. But Hyundai hasn't gone tech-overload here like Mercedes, or ultra-minimalist like a Tesla Model 3 - there's a balance between large, useful screens, touch panels and physical switchgear and solid materials on all your regular ...
