

Is a pc battery backup considered a power adapter

Overview

What is a battery backup?

A battery backup, or uninterruptible power supply (UPS), is primarily used to provide a backup power source to important desktop computer hardware components. In most cases, those pieces of hardware include the main computer housing and the monitor, but other devices can be plugged into a UPS for backup power, depending on the size of the UPS.

Why do I need a battery backup?

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.

Can a battery backup be plugged into a ups?

In most cases, those pieces of hardware include the main computer housing and the monitor, but other devices can be plugged into a UPS for backup power, depending on the size of the UPS. What Does a Battery Backup Do?

.

Where can I buy a battery backup?

Once you've chosen the right one for you, you can buy a battery backup from popular manufacturers like APC, Belkin, CyberPower, and Tripp Lite, among many others. Battery backup has many names, including uninterruptible power supply, uninterruptible power source, online UPS, standby UPS, and UPS.

How does a battery backup unit work?

If you're unfamiliar with how it works, a battery backup unit basically sits idly

by monitoring the power line for voltage drops and power outages. When an issue with the power line occurs, the power source to the computer is switched virtually instantaneously from line power (electrical outlet) to the unit's internal battery.

Why should you buy a UPS battery backup?

Whether that's a blackout, brownout, or power surge, the best UPS battery backup will give you the time to save what you're doing and turn off your machine safely. Power surges and interruptions can be bad news for PC components, so what you're buying is peace of mind more than anything else.

Is a pc battery backup considered a power adapter

What Is a Battery Backup? (Uninterruptible Power Supply)

A battery backup, aka UPS (Uninterruptible Power Supply), is a device that provides backup power and consistent electricity to a computer system. Battery Backups: What They Look Like The front of the battery backup will usually have a power switch to turn the device on and off and will sometimes have one or more additional buttons that perform various functions.
