Overview

What is Project Ilen?

Project Ilen is a leading floating wind project on the west coast of Ireland. Western Star Wave, 'Project Saoirse', named after a sister vessel to Ilen, built in Baltimore West Cork, is a pre-commercial demonstration wave energy conversion project located 4-6km offshore Co. Clare, with a starting capacity of 5MW.

Can offshore wind unlock Ireland's energy potential?

Offshore wind can unlock Ireland's energy potential. Lynch argues that they have "stymied themselves" by limiting all this to shallow fixed wind. "The whole European market and world market thinks that floating and deep-fixed [wind energy] is where the market is really going to be and is what makes the industry attractive."

Is Ireland losing out on offshore wind investment?

Kevin Lynch, chief executive, Source Galileo, says that despite its prime location, Ireland is losing out on offshore wind investment to countries such as Norway, the UK and Portugal. Photograph: Alan Betson Later this year, France, Norway, Portugal and the UK will auction parts of their territorial waters to develop floating offshore wind.

Why should Europe invest in offshore wind power?

"The scale of our offshore wind potential, when coupled with hydrogen production, offers a once-in-a-century industrial development opportunity as well as a high-value export capability," the draft states. It adds that the Republic's "offshore energy potential makes it central to Europe's shared energy future".

Will Ireland be able to get 40GW of offshore wind by 2050?

"It means that they have figured out that Ireland is important," he says. But

he maintains that the State still intends doing nothing about it until after 2030. “It’s like saying that this is going to be the biggest game in town, and we’re going to get to it in six years.” Government policy sets a target of 40GW of offshore wind by 2050.

How much does it cost to build 100GW offshore wind?

Every gigawatt of floating offshore wind costs around €2.5 billion to build, so that 100GW we should be targeting by 2050 will have a €250 billion price tag. The EU has already established a green hydrogen bank to provide the hundreds of billions of euros needed to develop this fuel.
