

# **Is it a good idea to lay photovoltaic panels on the mountain**

## Overview

---

Can solar panels be mounted on a flat roof?

For solar panels on a flat roof, mounting systems are slightly different and can include a triangle 'ballast' box to support the panels. For solar thermal panels (with cells that use the sun's heat to warm water in a house) things are a little different.

Should solar panels be installed in landscape orientation?

Installing solar panels in landscape orientation is often the default choice for solar designers. The simplicity of design and installation, coupled with the widespread use of landscape-mounted panels in commercial installations, makes it a go-to solution for many solar projects. However, simplicity does not always equate to optimal performance.

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Are ground-mounted solar panels better than rooftop solar panels?

Ground-mounted panels offer more flexibility in positioning and angling for optimal sun exposure, often making them more efficient. They are also easier to access for maintenance and repair than rooftop panels. What are the main benefits of ground-mounted solar panels?

.

Can solar panels be installed on a steep roof?

Most roofs have slopes between 30 and 40 degrees, which allows solar panels to lie flush against the rooftop and produce enough energy to power your

home. For homes with a steep roof, you might not be able to place panels at the optimal tilt with traditional solar racking systems.

### How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.
