

Is it good to install photovoltaic panels on the roof of a new village

Overview

Can PV panels be installed on a new roof?

Where PV panels are to be installed on an existing roof, consideration should be given to the extra weight they will add. If you are planning to install panels on a new roof as part of a new build or reinstatement, it is important to be aware of the different risk implications of different roof types (e.g. flat vs pitched).

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Should I install solar panels on my roof?

If your roof faces another direction as you can likely still see plenty of benefit from installing a solar array. East and west facing roofs are also suitable for solar panels and will still see a good deal of energy generation throughout the course of the day.

Are solar panels good for a roof?

When solar panels are attached to the roof they can block some of the adverse weather, and in theory your roof could last longer. Roof solar panels also have a cooling effect. By absorbing the sunlight that would otherwise penetrate your roof without solar panels, they keep temperatures down.

Are solar panels a good idea for a new build?

Understand the current regulations surrounding solar panels on new builds, and whether they'll change soon. By incorporating solar panels, developers enhance the property's energy performance, and also make it more attractive

to eco-conscious buyers looking to save time and effort on forking out the high upfront cost of solar panels.

Can solar panels be installed on a north facing roof?

While it isn't recommended to have solar panels installed on a north facing roof in the UK, you can still have them installed if you wish but they won't perform as well - as we saw from the table above. So if you don't have a south facing roof, don't let that put you off the idea of renewable solar energy as it is still very much a possibility.
