

Is it illegal to install photovoltaic panels randomly

Overview

A do-it-yourself solar panel installation is not illegal. You'll typically not need planning permission to install solar panels on the roof of your residential property. Are solar panels legal?

However, it's crucial to understand that while installing solar panels is legal, certain conditions must be met. For most domestic properties, solar panel installations are considered a "permitted development" and do not require planning permission, provided they respect certain size criteria.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system – so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

.

Do solar panels need planning permission?

Typically, solar panel installations in the UK are considered “permitted developments” and do not require planning permission, as long as they meet certain conditions. However, permissions are necessary if the building is listed or in a conservation area. What is MCS certification and why is it important for solar panel installation?

.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.
