

# Is the solar power station illegal

## Overview

---

Are solar panels legal?

However, it's crucial to understand that while installing solar panels is legal, certain conditions must be met. For most domestic properties, solar panel installations are considered a "permitted development" and do not require planning permission, provided they respect certain size criteria.

Can a local authority give permission to a solar power station?

Local authorities are only permitted to give permission to solar power stations up to a certain size (50MW) - and the judge agreed that the Burnhope plans exceeded that size. In a written decision, Mr Justice Fordham ordered the quashing of the planning permission.

Do solar panels need planning permission?

Typically, solar panel installations in the UK are considered "permitted developments" and do not require planning permission, as long as they meet certain conditions. However, permissions are necessary if the building is listed or in a conservation area. What is MCS certification and why is it important for solar panel installation?

.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Is Durham planning permission for a solar farm 'unlawful'?

A council decision to grant planning permission for a large solar farm in the County Durham countryside was "unlawful", a High Court judge has ruled. The

proposal to build the 92-hectare site on farmland near Burnhope was approved by Durham County Council in March 2023 despite residents' concerns it would devastate the nearby community.

Do solar farms need planning permission?

Below this threshold, solar farms will require planning permission from the local planning authority (LPA); under the Town and Country Planning Act 1990, LPAs are responsible for renewable and low carbon energy development of 50 MW or less installed capacity.
