

Is the warning light always on solar power

Overview

What does a red light on a solar meter mean?

Solid red light means supply is live, but no power (approx) is being consumed. When power is being consumed, it goes out and you get a flashing red light. On your electricity suppliers web page, there is probably a "how to read my meter" section that is specific to the models used in your region. Have you got solar panels?

.

Why is my solar panel flashing green?

Solar panel flashing green light When the solar controller detects solar energy input, the PV icon and light will blink for a few seconds, and then enter a stable state. The screen will not light up and the indicator light will not light up if the solar regulator does not detect the solar input.

Why does my solar panel light not light up?

The screen will not light up and the indicator light will not light up if the solar regulator does not detect the solar input. If the solar input is unstable or the pressure is too high, the solar panel light will blink yellow or red to indicate that the solar input is not stable.

How do I know if my solar controller is working?

The icon and lights on the solar controller flash or change color for the solar panels, battery, and loads that are explained as fellow. Solar panel flashing green light When the solar controller detects solar energy input, the PV icon and light will blink for a few seconds, and then enter a stable state.

How do I know if my solar system has a fault?

Most homeowners had no idea their PV system had a fault. Your electricity bill should tell you if your system's producing expected generation. A large,

unexplained increase in electricity costs could indicate a reduction in solar power. Also, comparing last years solar generation figures with this years will help spot if there's a problem.

Why is my solar panel light blinking red?

If the solar input is unstable or the pressure is too high, the solar panel light will blink yellow or red to indicate that the solar input is not stable. The solar panel light does not light up at night because there is no solar input, if the light does light up, there is a problem with the charge controller.
