

Is there anything fishy about installing solar power generation

Overview

Are there myths about solar panels?

Homeowners are installing solar panels in increasing numbers and reaping the financial and environmental benefits. But some are still hesitant because of myths around cost, performance and durability of panels. Here, we debunk the most common myths so that you have all the facts you need before you pivot to panels.

Should you invest in solar panels?

More than a million homes in the UK now have solar panels. They're a guaranteed way to use truly renewable electricity, but many people are not sure about whether to invest. Some are put off by uncertainty about costs, others believe the installation will be disruptive and many worry that solar panels will be tricky to maintain.

Do solar panels generate electricity?

That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use. Even in winter, solar panel technology is still effective; at one point in February 2022, solar was providing more than 20% of the UK's electricity.¹

Are solar panels renewable?

And, solar energy from panels is 100% renewable, meaning you don't need to burn carbon-emitting fossil fuels to generate energy, which is good news for the long term health of the planet. Panels are built to last. Panels are made of steel, silicon and toughened safety glass.

Are solar panels a good investment in the UK?

Solar panels on properties in the south of the UK are usually able to generate more energy than those in the north due to increased amounts of sunlight.

Energy in the form of heat can also be captured and used for heating in the home.

What is solar photovoltaic (PV) power generation?

Solar photovoltaic (PV) power generation is the process of converting energy from the sun into electricity using solar panels. Solar panels, also called PV panels, are combined into arrays in a PV system. PV systems can also be installed in grid-connected or off-grid (stand-alone) configurations.
