

Japan s solar power generation and electricity sales

Overview

In 2022, solar energy accounted for 5.39% of Japan's total energy mix and 9.91% of its electricity generation. In both cases, solar power in Japan holds the largest share of all renewable sources. What percentage of Japan's Energy is solar?

In 2022, solar energy accounted for 5.39% of Japan's total energy mix and 9.91% of its electricity generation. In both cases, solar power in Japan holds the largest share of all renewable sources. This is a drastic contrast to even a decade ago when solar energy contributed less than 1% of the country's energy.

What percentage of Japan's electricity generation is renewable?

As a result, the share of renewables in Japan's total electricity generation in 2021 was 22.4%, up approximately 2 percentage points from 20.8% in the previous year in Figure 1 and Table 1.

Is solar energy the future of Japan's Energy Strategy?

Solar energy in Japan is emerging as a cornerstone of Japan's strategy to meet its ambitious long-term sustainability goals. The Sixth Strategic Energy Plan aims for carbon neutrality by 2050 with an interim goal of 36-38% of energy from renewables by 2030.

Why is solar power growing in Japan?

The steady growth of solar power in Japan is attributed to several factors, including the country's focus on energy security, economic efficiency and environmental sustainability. Post-Fukushima, there was a national reevaluation of energy sources.

Will Japan's solar energy industry grow in 2029?

Overall, the growth potential for Japan's solar energy sector is immense, which will help spur the country's domestic PV industry. Forecasts suggest the solar

energy market will see a compound annual growth rate of 9.2% until 2029.

What is the share of renewables in Japan?

The share of renewables in Japan's total annual electricity consumption averaged 22.3% in 2023 , up from an annual average of 20.5% in 2022 (Figure 7). The share of solar PV was 10.7%, and together with the 1.2% share of wind power, the share of variable renewables VRE was 11.9%.

Japan's solar power generation and electricity sales

Japan 2021 - Analysis

Japan's carbon intensity of energy supply increased rapidly after 2011 and is only gradually reducing since; the carbon intensity of power generation is among the highest in IEA member countries.

2023 Share of Electricity from Renewable Energy Resources in Japan ...

As a result, the share of renewables in Japan's total electricity generation in 2023 was 25.7% (Table 1, Figure 1). Among these, solar power generation reached 11.2%, ...

[Japan: solar energy generation capacity 2023](#)

In 2023, the generation capacity of solar energy in Japan amounted to around 87 thousand megawatt. Electric Power Development's electricity sales volume FY 2022, by ...

[The Electric Power Industry in Japan](#)

In fiscal 2021, electric power generated in Japan came to 863.5 TWh (up 2.1% YoY), of which 19.0 TWh was generated by solar power and 7.4 TWh by wind power. The lackluster trading ...

2021 Share of Electricity from Renewable Energy Sources in Japan

Share of renewables to electricity generated in Japan. The percentage of total electricity generated in Japan are estimated including on-site consumption by power source in ...

Japan: solar power electricity generation by facility , Statista

Share of people who support solar energy Japan 2014-2023; Share of sales people who agree that solar power negotiations increase Japan 2023 Accessed November ...

2023 Share of Electricity from Renewable Energy ...

In 2023, solar PV accounted for 11.2% of annual electricity production, up 1.3 percentage points from 9.9% the previous year, and variable renewables VRE (solar and wind) accounted for 12.2%. Biomass power ...

[Japan: solar power generation advantages 2021](#)

Electric vehicle sales globally by model 2023. Topics. Topic overview. Automotive industry worldwide - statistics & facts According to a survey conducted on solar power generation in Japan in

[Solar Energy in Japan: Room For Growth](#)

In 2022, solar energy accounted for 5.39% of Japan's total energy mix and 9.91% of its electricity generation. In both cases, solar power in Japan holds the largest share ...

Japan: share solar power in energy generation 2023 , Statista

In 2023, the share of photovoltaic power in the total energy generation in Japan amounted to 11.2 percent, the historically highest amount. Average sales price of solar PV ...

Japan: solar power electricity generation by electric utilities

Share of people who support solar energy Japan 2014-2023; Share of sales people who agree that solar power negotiations increase Japan 2023 Accessed October 07, ...

Here's more about the 6th Strategic Energy Plan

It has now become cost-competitive with other sources of power generation. Japan's percentage of electricity generated by renewables in total power generation increased ...

Share of solar power in electricity generation APAC 2023, by ...

Quarterly domestic production volume of PV modules Japan FY 2018-2023; Average sales price of solar PV modules per watt Japan 2013-2022 "Share of solar power ...

2021 - Understanding the Current Energy Situation in Japan (Part 2)

Solar power generation capacity among major nations (Results for 2020) Please take this as an opportunity to think about the future of Japan's energy. For more ...

2022 Share of Electricity from Renewable Energy Sources in Japan

Share of renewables to electricity generated in Japan. The share of total electricity generated in Japan including on-site consumption by power source in 2022 was ...

Can Japan Recapture Its Solar Power? , MIT Technology Review

By 2001 total solar-power output in Japan was 500 times higher than it had been a decade earlier--a decade in which U.S. solar generation edged up by a meager 15 ...

Economic and Energy Outlook of Japan for FY2024

Energy sales , Electricity sales will slightly rise. City gas sales will increase for the first time in three years but remain lower than FY2022. Total fuel oil sales will decrease for the third year ...

Solar Power Generation Costs in Japan: Current Status and ...

This report studies the cost structure for solar PV in recent years based on a questionnaire-centered survey, and analyzes the generation cost of solar PV in Japan. Given ...

Tenfold Increase in Japan's Solar Power Capacity over 10 Years

According to the latest data released in a fiscal 2023 white paper on energy, Japan's cumulative installed solar-power capacity was 69.35 million kilowatts in fiscal 2021.

Renewable energy in Japan

Generation capacity of solar energy Japan 2014-2023. Electricity sales volume of Electric Power Development Co., Ltd. (J-POWER) in fiscal year 2022, by energy source (in billion kilowatt hours

Japan's solar innovation & growth, trends and future plans

Solar is expected to supply 14% to 16% of Japan's energy mix in fiscal year 2030, with a target PV generation capacity of 117.6 GW (AC). Japan's Future Plans in ...

2020 Solar Energy Statistics In Japan

The 2020 Solar Energy Market In Japan. Back in 2011, the share of renewable energy in electricity generation in Japan was only around 10%. That number has since doubled with 2020 showing numbers as high as ...

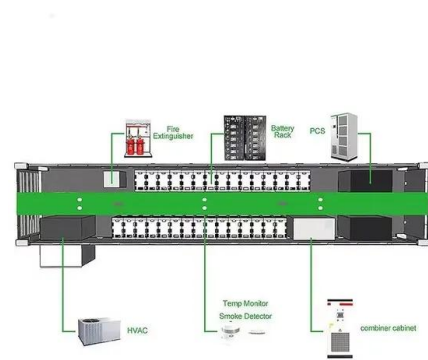

Japan: electricity production of solar power plants by

As of June 2022, the electricity generation of solar power plants in Fukushima prefecture amounted to about 174.5 million kilowatt hours, making it the prefecture with the ...

Electricity explained Electricity generation, capacity, and sales in

Electricity generation. In 2023, net generation of electricity from utility-scale generators in the United States was about 4,178 billion kilowatthours (kWh) (or about 4.18 ...

Japan: solar power generation capacity forecast 2032

The installed power generation capacity of solar power in Japan was forecast to reach approximately 97 million kilowatts in 2032. Energy. Average sales price of solar PV ...

Kyushu Electric Power: grid-connected solar and wind power generation

In fiscal year 2021, Kyushu Electric Power's generation capacity of solar power on mainland Kyushu reached almost 11 thousand megawatts, up from around 7.9 thousand ...
