

# **Large span cable-rod photovoltaic support**

## Overview

---

What is a large-span flexible PV support structure?

Proposed equivalent static wind loads of large-span flexible PV support structure. Flexible photovoltaic (PV) support structure offers benefits such as low construction costs, large span length, high clearance, and high adaptability to complex terrains.

What is a cable-supported photovoltaic system (CSPs)?

Cable-supported photovoltaic systems (CSPs) are a new technology for supporting structures that have broad application prospects owing to their cost-effectiveness, light weight, large span, high headroom, few pile foundations, short construction period, and symbiosis with fisheries and farms.

What is cable-supported photovoltaic (PV)?

Cable-supported photovoltaic (PV) modules have been proposed to replace traditional beam-supported PV modules. The new system uses suspension cables to bear the loads of the PV modules and therefore has the characteristics of a long span, light weight, strong load capacity, and adaptability to complex terrains.

What is a new cable supported PV structure?

New cable supported PV structures: (a) front view of one span of new PV modules; (b) cross-section of three cables anchored to the beam; (c) cross-section of two different sizes of triangle brackets. The system fully utilizes the strong tension ability of cables and improves the safety of the structure.

What are the characteristics of a cable-supported photovoltaic system?

Long span, light weight, strong load capacity, and adaptability to complex terrains. The nonlinear stiffness of the new cable-supported photovoltaic system is revealed. The failure mode of the new structure is discussed in

detail. Dynamic characteristics and bearing capacity of the new structure are investigated.

How many cables does a PV system use?

However, most of the traditional cable-supported PV systems use only two cables to support the PV modules. The settlement of the support cables due to self-weight of PV modules always reduces their power generation efficiency. Therefore, it is necessary to make a reasonable design to flatten the structures.

## Large span cable-rod photovoltaic support

---

### Wind Load Effects and Gust Loading Factor for Cable-Suspended

The cable-suspended PV system has gained increasing popularity due to its large span and good site adaptability. However, this structure is quite sensitive to wind actions, ...

### Mechanical characteristics of a new type of cable-supported

Fig. 5 shows two PV support systems-the proposed cable-supported PV system and a traditional fixed mounted PV system located in Tianjing, China. The new cable ...

### Experimental investigation on wind-induced vibration of photovoltaic ...

recent years. With rapid expansion of solar energy plants, a cable-supported photovoltaic (PV) system has received increasing attention due to its large span and good terrain adaptability. It ...

### Effect of tilt angle on wind-induced vibration in pre-stressed ...

However, PV flexible system, formed by prestressed flexible cable structure is a large-span PV module support with spans of 10-40 m and has gained popularity in recent ...

**Analysis of wind-induced vibration effect parameters in flexible cable ...**

Semantic Scholar extracted view of "Analysis of wind-induced vibration effect parameters in flexible cable-supported photovoltaic systems: A case study on ground anchor ...

**China Flexible Support Series, Large Span, Double Cable/Three Cable ...**

Description \* Simple structure, easy maintenance and installation, designed to be applicable to a variety of complex terrain \* Flexible photovoltaic support structure will be more suitable for ...

[T/CEPPEA 5017-2023 ?????????????????? ????](#)

T/CEPPEA 5017-2023????????,????????????????????, Technical regulations on the structure of large-span cable-rod photovoltaic supports, ?????????????????? ...

### Wind-induced response and control criterion of the double-layer cable ...

With the increasing demand for the economic performance and span of the cable support photovoltaic module system, double-layer cable support photovoltaic module ...

### Wind-induced vibration and its suppression of photovoltaic modules

Cable-supported PV modules are prone to large vibrations under cross. CRediT authorship contribution statement. Xu-Hui He: Supervision of wind tunnel tests based on the ...

### Evolution of wind-induced vibration form of large-span flexible PV

DOI: 10.1016/j.solener.2024.112684 Corpus ID: 270863868; Evolution of wind-induced vibration form of large-span flexible PV aeroelastic arrays @article{Cai2024EvolutionOW, ...
