Latest solar technology news

Solar Energy News

Solar energy refers to the harnessing of the Sun's energy and converting it into usable forms, primarily electricity and heat, using various technologies. The most common method is through photovoltaic (PV) systems, where solar panels composed of numerous solar cells convert sunlight directly

The Latest Developments and Breakthroughs in Solar

The solar industry has come a long way in just the last few years. The latest developments and breakthroughs in solar technology include longer-lasting solar cells, solar cells that you can print onto flexible surfaces, solar panels that track the sun from east to west throughout the day, and solar power plants that work at night.

News - pv magazine USA

Latest news on the solar energy and photovoltaics industry in the USA: installations, manufacturing, markets & policy, and technology. Steel manufacturing accounts for 8% of global energy demand and 7% of energy ...

News , SMA Solar

EQS-News: SMA Solar Technology AG / Key word(s): Annual Results SMA Group reports extraordinarily strong 2023 27.03.2024 / 06:57 CET/CEST The issuer is ... Read more Show all Ad-hoc Announcements 09/25/2024 EQS-Adhoc

Solar technology: What's the latest breakthrough? (2019)

Solar power is in a constant state of innovation in 2019, with new advances in solar panel technology announced constantly. In the past year alone, there have been milestones in solar efficiency, solar energy storage, wearable solar tech, and solar design tech. Read

Paper-thin solar cell can turn any surface into a power source

MIT researchers developed a scalable fabrication technique to produce ultrathin, flexible, durable, lightweight solar cells that can be stuck to any surface. Glued to high-strength fabric, the solar cells are only one-hundredth the weight of conventional cells while producing about 18 times more power-per-kilogram.

Solar panel technology is set to be turbo-charged

Enter "tandem solar cells", the new generation in solar technology. They can convert a much greater portion of sunlight into electricity than conventional solar cells. The technology promises to fast-track the global ...

South Africa registers R7.8 billion new solar in just three months

South Africa has been registering an average of 40 new solar generating facilities a month, but is still missing the mark in a big way. The national energy regulator Nersa says it registered 124

Latest Solar Technology Advancements: What's New and Exciting

Solar technology has come a long way in recent years, and the latest advancements are genuinely exciting. From more efficient solar cells to innovative solutions for storing renewable energy, there's plenty happening in this field. The future of energy is shifting towards sustainable solutions, making solar technology advancements crucial for a greener ...

Latest Trends in Solar Technology

This blog post will delve into the latest trends in solar technology, highlighting how these advancements are shaping the renewable energy landscape. We'll explore new solar panels, emerging storage solutions, and innovative applications that are making solar energy more efficient, affordable, and accessible than ever before.

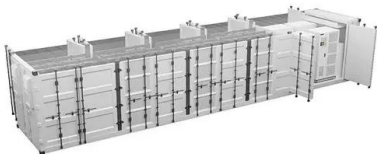

Once seen as fleeting, a new solar tech proves its lasting power

Princeton Engineering researchers have developed the first perovskite solar cell with a commercially viable lifetime, marking a major milestone for an emerging class of ...

pv magazine India - Photovoltaic Markets and Technology

Photovoltaic Markets and Technology Laboratory testing has revealed that some negatively-doped, "n-type" tunnel oxide passivated contact (TOPCon) and heterojunction (HJT) solar modules are susceptible to ultraviolet (UV) light-related damage and degradation.

Energy Technology News

Energy News and Research. From super-efficient hybrid vehicles to new energy sources, read all the latest science news from leading energy technology laboratories around the world. Thursday

A new kind of solar cell is coming: is it the future of ...

NEWS FEATURE. 29 November 2023. A new kind of solar cell is coming: is it the future of green energy? Firms commercializing perovskite-silicon 'tandem' ...

Tech News , Today's Latest Technology News , Reuters

16 ????· Find latest technology news from every corner of the globe at Reuters , your online source for breaking international news coverage. Skip to main content Exclusive news, data and analytics for

Latest Solar Panel Technology -- Clean Energy Reviews

We examine the latest solar panels and explain how advanced PV cell technologies help improve performance and efficiency, plus we highlight the most advanced panels from the leading manufacturers. Learn about recent ...

Latest News Blogs Events News news Scottish budget should bring back solar loans Read more news Solar taskforce meets in drive for clean power Read more news Solar Energy UK backs solar aid for Ukraine Read more news SEUK members win big at

News About Solar Power From Solar Technology International

Solar Technology International brings you all the latest news about solar power, including product information, spotlights on innovation and much more. Free & fast delivery on all mainland UK orders over £50 Learn About Solar News Our Story Stockists Contact

2024 Climate Tech Companies to Watch: First Solar and its ...

Solar's future looks just as bright--global solar capacity is expected to reach nearly 2,000 terawatt-hours this year, and the IEA says we could see it quadruple by the end of the decade. In

Solar cells

Solar cells are devices for converting sunlight into electricity. Their primary element is often a semiconductor which absorbs light to produce carriers of electrical charge. An applied electric

Advanced solar panels still need to pass the test of time

The latest such news comes from Oxford PV--in January, the company announced that one of its panels reached a 25% conversion efficiency, meaning a quarter of the solar energy beaming onto the

Once seen as fleeting, a new solar tech proves its ...

An emerging class of solar energy technology, made with perovskite semiconductors, has passed the long-sought milestone of a 30-year lifetime. The Princeton Engineering researchers who designed the new device ...

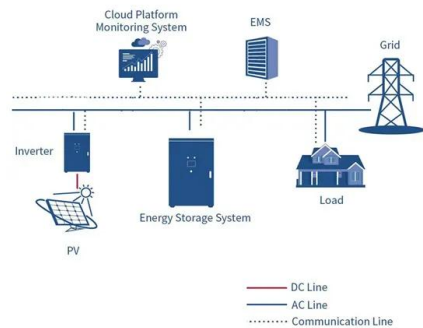

Researchers improve efficiency of next-generation solar cell

In terms of scientific milestones, not only do they achieve an efficiency that was the certified record for perovskite solar cells for much of last year, they also achieve open-circuit voltages up to 97 percent of the radiative limit. This is an astonishing achievement for

Solar energy and photovoltaic technology

3 ???· Solar energy and photovoltaic technology is the study of using light from the sun as a source of energy, and the design and fabrication of devices for harnessing this potential. This involves

Solar technology

ETEnergyworld brings latest solar technology news, views and updates from all top sources for the Indian Energy industry. Meghalaya govt to power its remote health centres using solar technology The state government said it plans to cover all rural health

New solar cells break efficiency record - they could eventually

Tandem solar cells have huge potential. NREL, Author provided (no reuse) The cost of solar electricity The new record-breaking tandem cells can capture an additional 60% of solar energy. This

Paper-thin solar cell can turn any surface into a power source

MIT researchers developed a scalable fabrication technique to produce ultrathin, flexible, durable, lightweight solar cells that can be stuck to any surface. Glued to high-strength ...

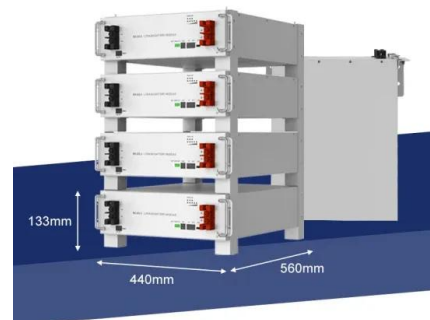

Technology: Latest Tech News Articles Today , AP News

Don't miss an update on the latest tech news from The Associated Press. AP News has everything you need to know for technology news today. The Associated Press is an independent global news organization dedicated to factual reporting. Founded in 1846, AP

Researchers develop a roadmap for growth of new solar cells

Materials called perovskites show strong potential for a new generation of solar cells, but they've had trouble gaining traction in a market dominated by silicon-based solar cells. Now, researchers at MIT and elsewhere outline a roadmap for how this promising technology could move from the lab to a significant place in the global solar market.
