

Li Qian Photovoltaic Bracket

Overview

What is a fixed adjustable photovoltaic support structure?

In order to respond to the national goal of “carbon neutralization” and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project, a fixed adjustable photovoltaic support structure design is designed.

How efficient is a 500 nm active layer?

Moreover, the device with an active layer thickness of 500 nm also shows an efficiency of 15.21%. This work provides valuable insights into the fabrication of OSCs with thick active layers.

Do above-bandgap photons affect the domains of BiFeO₃ thin film?

The effect of above-bandgap photons on the domains of BiFeO₃ thin film was investigated via piezoresponse force microscopy (PFM) and Kelvin probe force microscopy (KPFM).
