Overview

An 18650 battery or 1865 cell is a cylindrical common in electronic devices. The batteries measure 18 mm (0.71 in) in diameter by 65 mm (2.56 in) in length, giving them the name 18650. The battery comes in many nominal voltages depending on the specific chemistry used. first developed the 18650 battery in 1994 "when there was a growin.

What is the diameter of 18650 battery?

The diameter of the 18650 battery is 18mm. To be more precise, it has an approximate length of 65mm and an approximate diameter is 18mm but technically 18650 battery size is allowed with some tolerance in length and diameter. Thus you could find specification written as, (say) $18 \pm 0.41\text{mm}$ ✖ $65 \pm 0.25\text{mm}$ on datasheet and features of Li-ion cell.

Are 18650 batteries lithium based?

18650 batteries are most commonly lithium-based. [citation needed] By 2023, some sodium-ion variants were available in the 18mm x 65 mm cylindrical cell form factor as well. [better source needed].

Are 18650 batteries a replacement for AA or AAA batteries?

They are not replacements for AA or AAA size cells. The 18650 battery has a nominal voltage of 3.6v and has capacity between 1200mAh and 3600mAh (read as mili-Amp-hours). The battery type 18650 are popular in rechargeable and high current draining devices considering its high-level capabilities like 250+ charge cycle and higher energy density.

How many Mah is a Panasonic 18650 battery?

Panasonic 18650 batteries inside a laptop. Each cell has a capacity of 2450 mAh. An 18650 battery or 1865 cell is a cylindrical lithium-ion battery common in electronic devices. The batteries measure 18 mm (0.71 in) in diameter by 65 mm (2.56 in) in length, giving them the name 18650.

What is a C rating for a 18650 battery?

C rating for a 18650 battery is usually 1C, this means that we can consume a maximum of 2.85A from the battery. This is because (Ah rating * C rating) gives us the maximum current that can be sucked out from the battery.

How long does a 18650 battery last?

An 18650 cell rated at 2850mAh means that when we consume 2.850A from the battery it will last for 1 hour and similarly if we consume only 0.285A from the battery it will last for 10 hours so we can use the Ah rating to calculate how long your battery will last for your application based on the current consumed.
