

Lithium battery guide for shippers

Overview

Lithium batteries weighing over 35kg must be approved by the national authority of the shipping and destination country before shipment. Defective or damaged lithium batteries must not be transported. Batteries must be packaged in a way that prevents damage, short-circuiting, and accidental activation. What is a shipping guide for a lithium cell/battery?

Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium cell/battery type, configuration, or size. DOT is committed to ensuring that information is available in appropriate alternative formats to meet the requirements of persons who have a disability.

What are the shipping requirements for lithium ion batteries?

In addition, lithium-ion cells and batteries shipped by themselves must be shipped at a state of charge not exceeding 30% of their rated capacity. Lithium batteries are dangerous goods, and all of the regulatory requirements must be complied with, as set out in the Lithium Battery Shipping Regulations.

What is the proper shipping name for lithium ion batteries?

Proper Shipping Name Mark - "Lithium ion batteries packed with equipment" or "Lithium ion batteries contained in equipment", as appropriate. Note: if the package contains both lithium ion batteries packed with and contained in equipment, the proper shipping name is "Lithium Ion Batteries Packed with Equipment".

Can You ship lithium ion batteries internationally?

Whether shipments are international or domestic, it's best to check with the air carrier for any additional requirements. When it comes to international shipping of lithium-ion batteries, ocean freight is the primary mode of transportation.

What information do you need to ship a lithium ion battery?

Shippers must clearly declare the contents of their shipment, including the type and quantity of lithium-ion batteries, their UN numbers, and classification details. Failure to provide accurate information can lead to delays, fines, or even shipment rejection at the port.

Do lithium ion batteries have to be on a shipper's declaration?

No. For lithium ion batteries shipped in accordance with Section IA or Section IB of PI 965, which must be on a Shipper's Declaration, the Shipper's Declaration includes a certification statement "I declare that all of the applicable air transport requirements have been met."

Lithium battery guide for shippers

ESS

Shipping lithium batteries: Guide for retailers , Starshipit

Commonly referred to as lithium-ion batteries, a lithium battery is a power source whose electrochemistry includes lithium and other rare earth materials. These batteries are extremely energy dense and are able to hold their charge much longer than older battery types such as nickel-cadmium, according to the Department of Energy in the US.

A Comprehensive Guide on Lithium-Ion Battery ...

These classifications provide a framework for shippers to identify and handle lithium-ion batteries properly, ensuring compliance with safety regulations and preventing accidents during transportation.
