Lithium battery trimmer review

Overview

The following reviews will walk through the key features of each cordless string trimmer and detail h.

When shopping for string trimmers (also known as weed eaters), consider the yard size, how often the tool will be used, and the height and strength of the primary user. The following ke.

Mark Wolfe is a writer and product tester with a background in the nursery and landscaping industry. For more than 20 years he mowed, edged, planted, pruned, cultivated, irrigat.

We were picky when selecting the battery-powered weed eaters for testing. We considered the brand; after all, Makita and DeWalt are well-respected players in the power tool industry. Still, we didn’t automatically eliminate up-and-comers like Greenworks and Ryobi, who are making exciting waves in battery.

The following reviews will walk through the key features of each cordless string trimmer and detail how the models performed in our backyard tests. Our Ratings: Power 5/5;.

Those still unsure how to use a battery string trimmer may find the following answers to common questions about these tools helpful.

When shopping for string trimmers (also known as weed eaters), consider the yard size, how often the tool will be used, and the height and strength of.

What kind of battery does a string trimmer use?

For most users, a string trimmer with a lithium-ion battery will be the best choice. Along with battery type, consider how much operating power the battery has, which is measured in volts. Today’s rechargeable string trimmer batteries range from 18V to 80V of power.

How long should a battery-powered string trimmer last?

It’s hard to say how many years a battery-powered string trimmer should last,

since these tools haven’t been around for very long. Other string trimmers typically last five to 10 years with proper maintenance.

How much does a string trimmer battery cost?

Today’s rechargeable string trimmer batteries range from 18V to 80V of power. More powerful batteries at the high end often are intended for commercial use and can cost $200 or more per battery. Some string trimmers in this category are sold without a battery (or battery charger), so the user must purchase one separately.

Are battery-powered string trimmers good?

Battery-powered models are quiet, clean, and easy to use, but they have their disadvantages, too. In our comprehensive buyers guide, we’ll help you decide if battery-powered is the best option for you and give tips on choosing the right model. But first, let’s dig into the best battery-powered string trimmers of the year.

What kind of battery does a grass trimmer use?

It comes equipped with a 36V 4 Ah lithium-ion battery and a bump-advance string trimmer head that works with either 0.095- or 0.105-inch weed eater string. This battery grass trimmer features a variable-speed throttle trigger and a loop handle with a quick-release function for fast, tool-free adjustments.

Which Stihl string trimmer is best?

A bit beefier than the Stihl FSA 60 R battery trimmer we tested in the past, the FSA 80 R is one of the best string trimmers in Stihl’s battery-powered residential tool lineup. It comes equipped with a 36V 4 Ah lithium-ion battery and a bump-advance string trimmer head that works with either 0.095- or 0.105-inch weed eater string.

Lithium battery trimmer review

[Best Cordless String Trimmer]

EGO POWER+ 56-Volt 15 inch String Trimmer Reviews Tech Gear Lab ranked it as the #5 on their list claiming it was the 'Top Pick' in their product review. [] TechGearLab chose the EGO string trimmer as a top pick, but cautioned it may have too much power for average yards, and say it's a great heavy-duty option.

Ego Power+ Powerload with Line IQ ST1623T Review , Tested

We ran each trimmer on its highest power until it died and timed how long it took to recharge the battery from zero to full. The Line IQ performed adequately in this metric. This trimmer ran for 50 minutes on its high setting under no load, which fell fairly ...
