

Live sky map

Overview

What is Sky Map Online?

Sky Map Online is a free web app that provides printable & interactive sky charts for any location, time and viewpoint. It shows the night sky stars up to magnitude 12, planets and DSO.

What is Sky live?

New interactive camera for Sky Glass launches in UK today Sky has introduced the all-new Sky Live: An interactive camera that brings gaming, workouts, and connectivity to your Sky Glass smart TV. Here's everything you need to know about this device including price, features, and how to buy one today.

How do I share a view of the sky?

You can share the current view of the sky, including all the added objects, camera direction and field of view. Click on the copy icon `content_copy` to automatically copy the link to the clipboard, or manually copy and paste the content of the text field: `content_copy`.

How do you know if the sky is changing?

Scroll the sky day by day with the next day button to see that the stars are rising a little earlier each evening. Why is the sky constantly changing?

As the Earth rotates on itself, we see the sky scrolling as if we were on a ride: the whole sky seems to turn the hours around a point near Polaris, the North Star (center of the map).

How can I view the sky from different angles?

Expand the side bar to adjust the time and date. By clicking and dragging the sky, you can view it from different angles. You can link directly to this view of the sky with this URL:.

What does 4 minutes mean in the sky?

These 4 minutes represent the difference between the length of a day (24 hours) and that of an earth's rotation (23 hours and 56 minutes). Scroll the sky day by day with the next day button to see that the stars are rising a little earlier each evening. Why is the sky constantly changing?
