

Loa energy canada

Overview

Are Canada's oil & gas regulations too strict?

Todd Korol/Reuters Canada announced regulations on Monday to cap carbon emissions from its oil and gas industry and reduce the release of greenhouse gases, a move bitterly opposed by the energy industry and met with lukewarm support from some environmentalists who say the rules are not strict enough.

Who is Logan energy?

Logan Energy is a high growth Canadian energy company. We create value for investors through proven leadership, strategic growth and the advancement of high-quality resource plays.

How clean is Canada's electricity system?

Canada's electricity system is 83% non-emitting and among the cleanest in the world, with heavy dominance of hydropower as well as an important role for nuclear.

How will Canada support the clean grid of the future?

Canada is advancing projects that support the clean grid of the future. Collectively with investments from the Fall Economic Statement 2020 and Budget 2021, Canada will achieve our climate change commitments and ensure a healthier environment and more prosperous economy for future generations.

Why is energy important in Canada?

Energy is critical to Canada's economy; it makes up 10% of the nation's gross domestic product and is a major source of capital investments, and trade flows, and a key generator of middle-class jobs, including for Indigenous peoples.

Will Canada's energy industry cut production by 1 million barrels a day?

Danielle Smith, the province's premier, said that meeting emissions cap would cause the province's energy industry to cut production by one million barrels a day by 2030. Last year, the province produced 4.3 million barrels a day. "This is not a responsible policy," Ms. Smith said at a news conference.
