[This seems excessive \(battery swelling\)](#)

The battery in that 2017 MacBook Pro is a lithium-polymer battery. LiPo batteries swell because of electrolyte decomposition, it's not a "safety" feature, it's a fire hazard. It isn't worth the risk to use it. The safe thing to do is to completely discharge it and recycle

Worried about your MacBook Pro battery exploding? Here

The battery in MY Macbook pro is not Lithium Iron, its Lithium Polymer (LiPo), which is a totally different beast and very dangerous in comparison to LiFe batteries. I'd double check that the battery you are discussing in the article is in fact LiFe and Not LiPo.

2018

This replacement MacBook Pro 13" (2018 - 2019) battery is what you need to bring your laptop back to life. It has 5086mAh capacity, which is the highest capacity available for this model of MacBook Pro will make your laptop run ...

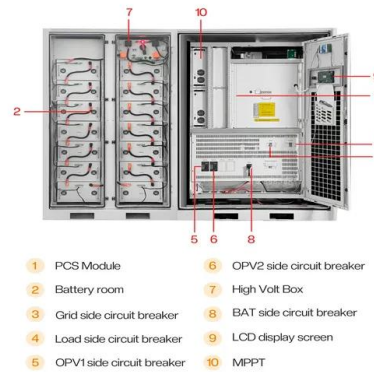

[Are the new mac laptop's lithium batterie...](#)
