Overview

Can PCB embedded thin magnetic film inductors be used for power supply?

Abstract: This paper details the design, assembly, and detailed characterization of printed circuit board (PCB) embedded thin magnetic film inductors for Power Supply in Package applications. Solenoidal inductors were assembled on copper tracks printed on PCB with wire bonds to complete the copper loop.

Can magnetic components be used in photovoltaic systems?

Along with the demand for efficiency of power conversion systems, magnetic component selection for photovoltaic solutions becomes more challenging for design engineers. This article features key principles of power conversion and magnetics solutions in solar energy applications.

How efficient is organic package substrate embedded magnetic core inductor technology?

Showcased remarkable efficiency exceeding 95% across a wide phase current range (0.11–2.32 A) in a standard 1.8 to 1 V interleaved converter. In this work, a cost-effective organic package substrate embedded coupled magnetic core inductor technology is proposed and demonstrated for power supply in package applications.

Is Package-embedded magnetic core inductor suitable for pwrSiP applications?

In this paper, we reported the design of a package-embedded coupled magnetic core inductor for PwrSiP applications. The coupled inductor is embedded in the organic package substrate based on a novel lithographically defined vias with a semi-additive process flow, which is highly compatible with ultra-thin package.

What is the application scenario for a coupled magnetic core inductor?

In this paper, the application scenario for the coupled magnetic core inductor

is a 1.8 to 1 V, 100 MHz standard interleaved converter .

What is the quality factor of a PCB inductor?

The assembled PCB inductor measured a highest quality factor of 8.5 for a three-turn device at 10 MHz. This paper details the design, assembly, and detailed characterization of printed circuit board (PCB) embedded thin magnetic film inductors for Power Supply in Package applications.
